

# A MAN IN CHARGE

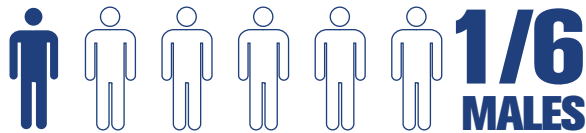

"With so many treatment options for prostate cancer, how do I know I'm making the right choice for me and my family?"

## Prostate Cancer:

**97%**  
MEN OVER 50

While men of all ages can develop prostate cancer, 97% of all cases occur in men over 50

In the United States, prostate cancer affects

**MEN WITH  
AFRICAN  
AMERICAN  
HERITAGE**

are **56%**  
more likely to develop  
prostate cancer

An estimated

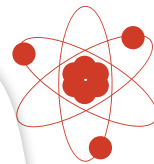

men in the United States are **living with prostate cancer** right now or have had it at some point

## Proton Therapy:

Proton therapy is an

**ADVANCED FORM**

of radiation therapy **that is a highly effective cancer treatment** for many types of tumors, including prostate

Protons deposit their energy directly into the tumor with no exit dose. As a result, the surrounding healthy tissue near the tumor is spared

With proton therapy, there is a **low risk** of short- and long-term **side effects** so a patient's quality of life is preserved

Proton therapy is

**MEDICARE APPROVED**  
for prostate cancer

## Prostate Cancer & Proton Therapy:

**BEING EMPOWERED**

means **being informed:**

research all of your treatment options before making a decision

**PROTON THERAPY SPARES  
MORE HEALTHY TISSUE**

surrounding the tumor so there is less risk of side effects such as impotence & incontinence

Proton beam delivery to the tumor only takes a few minutes and the entire treatment session ranges

**15-30 MINUTES**

with most patients **experiencing no pain or discomfort**

## The Patient Experience at ProCure:
